Professional Summary

Full-stack engineer who builds AI-powered products and ships with AI tools, across web, mobile (React Native, Expo) and desktop (Electron). Completed a software engineering internship at Greyloops, working with Next.js, React, Node.js, Express.js and MongoDB. Delivers complete products: RESTful APIs, a React Native app, a platform with LLM features (Gemini API, Hugging Face) and an Electron app with a GitHub Actions CI/CD release pipeline.

Technical Skills

Languages: JavaScript, TypeScript, C++, C#, SQL, HTML, CSS
AI & LLM: Gemini API, Groq API, Hugging Face Inference, Claude Code, AI-assisted development
Frontend: React, Next.js, Angular, Redux Toolkit, Tailwind CSS, GSAP, three.js, Vite
Backend: Node.js, Express.js, NestJS, RESTful APIs, JWT authentication, Mongoose
Mobile & Desktop: React Native, Expo, Electron
Databases: MongoDB, GridFS, SQL, Redis
DevOps: Git, GitHub, GitHub Actions, CI/CD, Vercel, Cloudinary, Jest
Other: Unity, VS Code; English (Proficient)

Experience

Greyloops Pvt Ltd Aug 2025 – Sep 2025
Software Engineering Intern, on-site, Johar Town, Lahore

- Contributed to the development and maintenance of web applications using the MERN stack and Next.js.
- Implemented UI components with React and Tailwind CSS.
- Contributed to backend APIs with Node.js and Express.js.
- Collaborated with senior developers on debugging, optimization and deployment workflows.

M-Labs Summer Program Jun 2024 – Aug 2024
Game Development Trainee

- Built "SlingKick", an Android football slingshot game, in Unity and C# with a team during the 2024 Summer Program.

Projects

Byters Food Review Platform (Team project) byters.site
Next.js, React Native (Expo), Node.js, MongoDB, Gemini API, Hugging Face Inference

- Team project with equal contributions, mainly the mobile app and the website; live and still being improved.
- Co-built a Next.js site and an Expo app on one RESTful API: authentication, reviews, restaurant pages, leaderboard and badges.
- The platform includes AI review summaries (Gemini 2.5 Flash with automatic fallback to Hugging Face Qwen 2.5 7B Instruct, one-week cache, prompt-injection sanitising), logs every AI call to an admin stats page, and uses BAAI/bge-base-en-v1.5 text embeddings.

Marginalia – Reading and Annotation Desktop App (Co-developed)
Electron, React, TypeScript, Vite, Tailwind CSS github.com/muzammil-shayk/Marginalia

- Co-developed an app that reads and annotates PDF, EPUB, DOCX and TXT files, with notes export to Markdown and JSON.
- Shipped releases through v2.9.0 via GitHub Actions CI/CD with in-app auto-update.

Handwritten – Text to Handwriting on A4 (Solo project) i-penned-it.vercel.app

- Built a JavaScript web app that sets typed text in real handwriting on A4; deployed on Vercel.

AirBeam – File Sharing Service airbeam.onrender.com — github.com/muzammil-shayk/AirBeam

- Developed a React, Express.js and MongoDB file sharing app with key-based downloads, a RESTful API and GridFS storage.

AirQR – Modern QR Code Generator airqr.vercel.app — github.com/muzammil-shayk/AirQR

- Built a Next.js and TypeScript QR code generator with custom styling, PNG and SVG export and a public API.

Education

University of Management and Technology, Lahore – BS in Computer Science, *CGPA: 3.50* 2023 – Present

Punjab Group of Colleges, Lahore – Intermediate in Pre-Medical, *Grade: A* 2020 – 2022

Certifications

100 Days of Web Developer Bootcamp – Udemy (2024)
M-Labs Rookie Game Jam Completion (2024)
Greyloops Intern Junior Software Developer (2025)
